Electronic temperature control

Introducing the smallest of the Ugolini family.

The micro is extremely compact, but it is as professional and reliable as its "bigger" sisters. Stylish and space saving, it will allow you to handle small quantities of product, avoiding waste. It is equipped with a new 3 litre bowl specially designed for better preparation of cold creams and easier collection of condensate. Its minimum size, high quality and intuitive electronic controls make it a reliable partner for your business.
